

Weaned bulls are trailed 25 miles to the Storer Ranch where they are wintered

## SALE BULLS

All bulls are spring born and weaned in early fall. They are kept on meadows until we trail them 25 miles by horseback to the Storer Ranch, where they are wintered. There the bulls are kept in large sandy lots and fed a high roughage, growing ration. They are performance tested as one group, subject to identical environmental conditions.

## PERFORMANCE INFORMATION

- **ADJUSTED 205 DAY WEIGHT:** Actual weaning weights adjusted to 205 days of age. These weights are for in herd comparison only.
- **YEARLING WEIGHT:** Bull adjusted to a 365 day weight.
- **A.D.G.:** Measurement of average daily body weight gain of bull on 108 day test.
- **W.D.A.:** Weight of bull divided by days of age as of February 16, 2008.

## Hebbert Replacement Heifers

## OUR COWHERD

Functional cows are the backbone of our operation. We cull our cows rigorously, keeping only the best cows. Every cow in our herd carries one brand. They have all been bred, born and raised on the Hebbert Ranch. This has enabled us to stack generations of pedigrees with genetics selected for calving ease, disposition, total performance and structural soundness.

This year we are offering another set of good using horses. We enjoy horses and spend as much time as we can horseback. All of these horses have been to the branding pen and have been used to drag calves to the fire. We open and shut gates on them, they trailer good and have been used in all phases of ranch work. These horses will sell following the bulls on April 4th.
